#### Hawaii's Past in a World of Pacific Islands

BY JAMES M. BAYMAN AND THOMAS S. DYE

Given its relatively late encounter with the West, Hawaii offers an exciting opportunity to study a society whose traditional lifeways and technologies were recorded in native oral traditions and written documents before they were changed by contact with non-Polynesian cultures. This book chronicles archaeology's role in constructing a narrative of Hawaii's cultural past, focusing on material evidence dating from the Polynesians' first arrival on Hawaii's shores about a millennium ago to the early decades of settlement by Americans and Europeans in the nineteenth century. A final chapter discusses new directions taken by native Hawaiians toward changing the practice of archaeology in the islands today.

#### Northwest Coast: Archaeology as Deep History

BY MADONNA MOSS

This concise overview of the archeology of the Northwest Coast of North America challenges stereotypes about complex hunter-gatherers. Madonna Moss argues that these ancient societies were first and foremost fishers and food producers and merit study outside socio-evolutionary frameworks. Moss approaches the archaeological record on its own terms, recognizing that changes through time often reflect sampling and visibility of the record itself. The book synthesizes current research and is accessible to students and professionals alike.
