

Society for American Archaeology

**— Fred Plog Memorial Fellowship—
(2018)**

Current Committee Charge: The committee solicits proposals and selects recipients for the Fred Plog Memorial Fellowship. The fellowship is presented in support of research to a graduate student with ABD status who is writing a dissertation on the American Southwest or northern Mexico or on a topic, such as culture change or regional interactions, on which Fred Plog did research.

Committee Composition: Committee composition is one chair and at least four members. Individuals ending their terms cycle off the committee at the close of the Business Meeting held during the annual SAA Meeting, and new appointees begin their terms at this time.

Term Length: Term length is three years. Individuals ending their terms cycle off the committee at the close of the Business Meeting held during the annual SAA Meeting, and new appointees begin their terms at this time.

Award Cycle: Not applicable.

Committee Chair and End of Term: Deborah L. Huntley [2018]

Committee Chair Contact Information: Deborah L. Huntley, Email:
deborahhuntley@gmail.com

Committee Members and Ends of Terms: Greg Wilson [2018], Kathryn Putsavage [2018], Kelly Graf [2018], Deanna N. Grimstead [2020]

Committee on Awards Chair: Mark C. Slaughter [2019]

Award Description: An award of \$1,000 is presented in memory of the late Fred Plog to support the research of a graduate student with ABD who is writing a dissertation on the North American Southwest or northern Mexico or on a topic, such as culture change or regional interactions, on which Fred Plog did research. In the case of a tie, the award is split equally between the fellows.

Who Is Eligible to Submit Nominations or Apply for the Award: All student members of SAA in good standing who are ABD by the time the award is made at the Annual Meeting of the SAA are eligible to apply for the award.

Nomination/Submission Materials Required: The application consists of 1) a research proposal no more than three single-space pages long (not including bibliography and tables/figures) that describes the research and its potential contributions to American archaeology, 2) a curriculum vita, and 3) two letters of support, including one from the dissertation chair that indicates the expected date of completion of the dissertation.

Nomination/Submission Deadline: November 1, 2017

Other Special Requirements: All nominees must be ABD by the time the award is made at the Annual Meeting of the SAA.

Selection or Evaluation Criteria: Committee members evaluate applications according to the merit and quality of applicant's research plan; the relevance of the research project to work in the North American Southwest or northern Mexico or on a topic, such as culture change or regional interactions, on which Fred Plog did research; the letters of support; and the academic record based on the curriculum vita. How the funds would be used to complete the dissertation will be an aspect of the evaluation.

Committee Deliberation Process (e.g. dates, venue): Electronic copies of applications are circulated to committee members during the week after the submission deadline. Committee members rank applications on scale of 1-3 (3 = highest) and submit rankings to the chair by the third week of November. No later than the first week of December, the committee chair distributes the tabulated rankings to the committee and coordinates a conference call or email discussion to select a fellow.

Nature of Award (e.g. monetary, medal, symposium): The award winner receives \$1000. In the case of more than one fellow being selected, the award amount is split equally. In addition, the awardee is recognized by the SAA through a plaque presented during the business meeting held at the Annual Meeting, a citation in *The SAA Archaeological Record*, and acknowledgment on the awards page of the SAA Website.

Awardees

2017 Katelyn Bishop

Katelyn Bishop has earned the Fred Plog Memorial Fellowship for her dissertation research on the nature of social and ceremonial organization and inequality in Chaco Canyon, New Mexico. By examining the role of birds in ritual practice, and by highlighting changes and variation in

ritual practice over time, Bishop's dissertation explores how ritual may have been used to negotiate a changing social and religious environment. This research employs three lines of evidence: avifaunal remains, iconographic representations of birds, and isotopic analysis of raptor remains. These data will not only document the physical use of birds in ritual practice, but also will illuminate the deeper symbolic meanings that may have guided their involvement in ritual and everyday life.

2016 Jacob Lulewicz

For his dissertation research on social networks and the emergence of organizational complexity in Southern Appalachia during in Late Woodland and Mississippian periods, we proudly present this award to Jacob Lulewicz. Jacob Lulewicz earned the Fred Plog Memorial Fellowship for his dissertation research on social networks and the emergence of organizational complexity in Southern Appalachia during the Late Woodland and Mississippian periods. Two distinctive regional political trajectories emerged here amid seven centuries of population growth and sociopolitical change. One, in northern Georgia, was centered on the monumental mound complex at Etowah. The other, in eastern Tennessee, consisted of many moderately sized, local aggregate villages with no clear political, economic, or ritual centralization. Lulewicz's research takes a multiscalar approach in comparing social networks across time and space and in investigating how the social and political positions of settlements within regional networks allowed for the growth of some settlements into politico-ritual centers. The Fellowship will allow him to refine the temporal contexts of emergent political complexity in northern Georgia through AMS dating, and to examine changes in ceramic production via thin-section petrography.

2015 Saul L. Hedquist

Saul L. Hedquist has earned the SAA's Fred Plog Memorial Fellowship for his ongoing dissertation research examining the social uses of turquoise and other blue-green minerals in the late prehispanic Western Pueblos of the US Southwest. Hedquist's research determines contextual and stylistic information for turquoise found at archaeological sites across the Western Pueblo region. Regional patterns of turquoise acquisition and exchange are being explored through isotopic analysis. Finally, consultation with Zuni and Hopi tribal members aids in the interpretation of the results. This award recognizes that Saul Hedquist's research will contribute to the understanding of traditional Pueblo practices involving turquoise and other minerals and fosters collaboration with descendant communities.

2014 Christopher W. Merriman and Kathryn J. Putsavage

Christopher Merriman and Kathryn Putsavage share the Fred Plog Memorial Fellowship to support their innovative doctoral research in the US Southwest. Merriman is examining human adaptations to climate change in the Late Pleistocene/Early Holocene transition in the American Southwest and Great Plains. He is combining theoretical models of expected foraging behavior with climate information derived through geomorphological studies. Kathryn Putsavage is using

the Black Mountain type site for the post-Mimbres to better understand the scale, timing, and nature of the Classic Mimbres to post-Mimbres transition. Her research uses pottery and obsidian sourcing to reconstruct social and economic networks before, during, and after the Classic Mimbres period.

2013 Katherine A. Dungan

2012 Joshua Watts

2011 William Reitze

2010 Matthew Peeples

2009 Sam Duwe

2008 Deanna Grimstead

2007 Michael Mathiowetz and Todd Pitezal

2006 None

2005 Greg Schachner

2001 Deborah Huntley

1999 Sarah Herr
